![ESKER logo]

[Esker](#) is a global cloud platform built to unlock strategic value for finance and customer service professionals, and strengthen collaboration between companies by automating the cash conversion cycle. Founded in 1985, Esker operates in North America, Latin America, Europe and Asia Pacific with global headquarters in Lyon, France, and U.S. headquarters in Madison, Wisconsin.

At Esker, our mission is to create an environment where good work gets noticed and employee well-being is taken seriously. If you thrive in working at a place where you can freely innovate, showcase your creativity, enjoy exchanging ideas with likeminded colleagues for continuous improvement of work efficiency and solutions for our customers, we like to hear from you.

Development Consultant (Based in Kuala Lumpur, Malaysia)

The Development Consultant will play a key role in the implementation team to work with clients to gather requirements and implement the Esker Web-based document management solutions.

Key Tasks/Duties
- Work as part of a team to implement Esker's on-premise software and SaaS solutions
- Utilize a variety of technologies to customize the Esker solutions such as end-user interface, reports and workflow to meet client business requirements
- Work closely with clients to define requirements, test the application and train end users
- Create and execute test cases to validate development and product configurations
- Configure to integrate with customer ERP systems or external applications
- Document product configurations for clients
- Trouble-shoot issues that arise in the course of configuring solutions and ensure these issues are ultimately resolved to the satisfaction of the project manager/team lead
- Work with sales, research & development and technical support teams to resolve issues for clients
- Identify improvements to our solutions, processes or supporting documentation
- Majority of time is dedicated to development and customization of Esker solutions to meet client business requirements
