

# wanted! RESEARCH SCHOLAR

*Monthly Stipend*

RM1800 - 2300

**TELL ME MORE!**

everything I need to know in 5 easy steps...

## 1 PROJECT

landslide prediction using IoT

Landslides are geological hazards that cause economic and life losses.

This project aims to design robust and accurate Internet-of-Thing sensors that can monitor slopes for potential landslides

## 2 REQUIREMENTS

do I have what it takes?

- ✓ Bachelors in Engineering or Computer Science
- ✓ Comfortable with hardware development
- ✓ Excellent command of English
- ✓ Self-motivated, resourceful & willing to learn
- ✓ Malaysian citizen only

## 3 RESPONSIBILITIES

what do I need to do?

- ⚙ Collaborate with other researchers
- ⚙ Implement research ideas
- ⚙ Prepare documentations
- ⚙ Enroll in Masters programme

## 4 DESIRED

extra points if I had these too...

- ? Handy with hardware development tools
- ? Some knowledge in programming languages
- ? Cheerful, independent & inquisitive
- ? Able to think out of the box

## 5 APPLY NOW!

hurry! I need to send my resume to...

- 📧 Dr. Goh Vik Tor
- 📍 Faculty of Engineering, Multimedia University
- ✉ vtgoh@mmu.edu.my
