

## USAGE OF ECO-FRIENDLY BIODEGRADABLE CONTAINER POLICY

Approving Authority	: Management Committee
Establishment Date	: 2 June 2010
Last Amendment Date	: 7 April 2026
Version	: 3
Responsible Division	: Cnergy

### **(A) Purpose**

The management of MMU (“Multimedia University” or “University”) encourages business premise operators to use eco-friendly biodegradable food and drink containers.

Hence, all business premise operators within MMU campuses are strongly encouraged to use eco-friendly biodegradable food and drink containers. The eco-friendly and non-biodegradable food and drink containers available in the market include, among others but not limited to:

1. Eco-friendly biodegradable food and drink containers made of tapioca.
2. Eco-friendly biodegradable food and drink containers made of rice husk.
3. Eco-friendly biodegradable food and drink containers made of coconut coir.
4. Eco-friendly biodegradable food and drink containers made of palm cake.

All business premise operators will be notified of this commitment, and engagement sessions with operators will be carried out from time to time to facilitate the transition.

Note: This is part of our initiatives for Climate Action.

### **(B) Implementation and Review**

MMU will implement the eco-friendly consumption initiatives progressively, in phases through achievable plans and institutional priorities. This policy will be reviewed periodically to ensure relevance and alignment with institutional goals and resources, and regulatory requirements and development.
